INTRODUCING

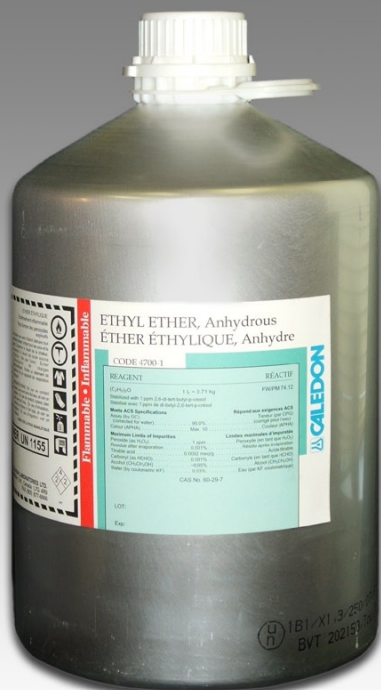

Caledon's New Aluminum Bottle

Safety is vital in the laboratory.

To improve the safety of your work environment, Caledon is pleased to offer a new packaging option – our light-weight 4 litre aluminum bottle.

Our new aluminum container is easy to use, with a convenient pouring handle to facilitate dispensing. Shatter-proof, this container helps to reduce the risk of accidental breakage that can occur with traditional glass bottles in certain conditions. Its superior closure system is designed to maintain product purity and integrity.

Depend on the new Caledon aluminum bottle to ensure peace of mind in your lab.

FEATURES

- U.N. approved container and packaging
- Seamless construction of high-purity recyclable aluminum
- Light-weight (only 420 g) yet highly impact resistant
- White polypropylene screw cap with Teflon liner
- Tamper-evident tear-off locking flange on cap
- Collar with convenient handle
