

High purity solvents and chemicals for research, analysis and production

Trust

Since 1971, leading government labs, pharmaceutical companies, universities and institutions the world over have chosen Caledon to be their primary supplier. Proudly Canadian, we have a proven reputation as a trusted source for all laboratory chemicals.

Quality

In our custom-designed production facility, we carefully produce our respected Caledon brand products to the stringent requirements of the largest institutions. In addition, our partnerships with other fine manufacturers allow us to supply every quality chemical you need in your lab.

Service

We take pride in our outstanding personalized customer service. Our knowledgeable, dedicated staff is driven to ensure your complete satisfaction, so you get products and service that consistently meet or exceed your expectations.

Delivery

Caledon has fully-stocked warehouses in Alberta and Ontario, and the flexibility to meet specialized needs, such as lot sequestering and custom packaging and sizes. We provide the product you need, as, and when you need it.

"One of the reasons we like Caledon is because of their size. They're much more flexible than larger suppliers."

MARTY SCHEIRING,
UNIVERSITY OF WESTERN ONTARIO

"We have utilized Caledon for many years and find their products and services to be exceptional."

DIANA MACMULLIN,
NAEJA PHARMACEUTICAL INC.

"Their service, delivery and sales team works perfectly together."

FAN GU,
INTERFACE BIOLOGICS INC.

Canada

We've Got You Covered

We're proud to distribute a complete line of products that complement the high-purity Caledon brand you've come to trust. We supply the most comprehensive list of chemicals from any independent Canadian manufacturer.

Extensive listing of high quality ready-to-use aqueous solutions including pH buffers, conductivity standards, indicators, pulp and paper industry standards, standardized solutions and custom formulations with cross references to APHA, ASTM and TAPPI methods.

Chiron supplies oil and gas companies and analytical laboratories with unique reference chemicals and high purity materials for geochemical, petroleum and environmental analyses. Neat reference chemicals for food safety, pharmaceutical and forensic applications are also available.

Inorganic standard solutions for environmental, ion chromatography and quality control applications including ICP, ICP-MS, AA, IC, and DCP. Water QC and custom standards are also available.

Macherey-Nagel offers a comprehensive range of chromatography products including TLC plates, bulk silicas, HPLC and GC columns, filter papers, derivatization reagents and standards, and filter papers.

A broad range of chemicals for Life Science Research including growth media, DNA and peptide synthesis reagents, nucleotides and protease inhibitors.

Full line of cleaning detergents for laboratory, healthcare, and industrial applications. Alconox is the industry leader for critical cleaning products for metal, glass, plastic, rubber, ceramics, and electronics.

Highly purified organic and inorganic pesticides with their corresponding metabolites, and other chemicals in both small quantities (under 10 grams) and in solution, for agricultural residue analysis, food testing and environmental monitoring.

A full range of inorganic standards for AA, ICP, ICP/MS, and Ion Chromatography, as well as organic standards for GC, GC/MS, and HPLC. Single and multi-component mixes and custom blends are available.

Analytical laboratory products including non-toxic, disposable and EPA-approved turbidity and water testing standards, perchloric acid and salts, inorganic salts and solutions, rare earth salts and solutions, and pyridine-free Karl Fischer reagents.

Inorganic, organic and organometallic compounds, pure metals and elements, precious metal compounds and catalysts, rare earths and analytical products.
