

# High purity solvents and chemicals for laboratory chemistry

## Trust

Since 1971, leading government labs, pharmaceutical companies, universities and institutions the world over have chosen Caledon to be their primary supplier. Proudly Canadian, we have a proven reputation as a trusted source for all laboratory chemicals.

## Quality

In our custom-designed production facility, we carefully produce our respected Caledon brand products to the stringent requirements of the largest institutions. In addition, our partnerships with other fine manufacturers allow us to supply every quality chemical you need in your lab.

## Service

We take pride in our outstanding personalized customer service. Our knowledgeable, dedicated staff is driven to ensure your complete satisfaction, so you get products and services that consistently meet or exceed your expectations.

## Delivery

Caledon has fully-stocked warehouses in Alberta and Ontario, and the flexibility to meet specialized needs, such as lot sequestering and custom packaging and sizes. We provide the product you need, as, and when you need it.

*"The helpful staff at Caledon have certainly made my job as a laboratory manager easier. In my experience, orders are always delivered within a reasonable time and the staff are a pleasure to deal with."*

**ROB BITCON,**  
BENCHMARK LABORATORIES GROUP LTD

*"We have utilized Caledon for many years and find their products and services to be exceptional."*

**DIANA MACMULLIN,**  
NAEJA PHARMACEUTICAL INC.

*"Their service, delivery and sales team works perfectly together."*

**FAN GU,**  
INTERFACE BIOLOGICS INC.

# We've Got You Covered

We're proud to distribute a complete line of products that complement the high-purity Caledon brand you've come to trust. We supply the most comprehensive list of chemicals from any independent Canadian manufacturer.

Ready-to-use superior aqueous solutions with cross references to ASTM, APHA and TAPPI methods – includes pH buffers, conductivity standards, indicators, standards and standardized solutions and custom formulations.

Unique reference chemicals and high purity materials for geochemical, petroleum and environmental analyses; neat reference chemicals for food safety, pharmaceutical and forensic applications.

Inorganic standard solutions for environmental, ion chromatography and quality control applications including ICP, ICP-MS, AA, IC and DCP. Water QC and custom standards are also available.

A full range of inorganic standards for AA, ICP, ICP/MS, and Ion Chromatography. Organic standards for GC, GC/MS, and HPLC. Single and multi-component mixes and custom blends.

Organic and inorganic pesticide standards with corresponding metabolites in small quantities and in solution.

Analytical chemicals including perchloric acid and salts, inorganic salts and solutions, rare earth salts and solutions and pyridine-free Karl Fischer reagents. Non-toxic, disposable, EPA-approved turbidity and water testing standards.

Inorganic, organic and organometallic compounds, pure metals and elements, precious metal compounds and catalysts, rare earths and analytical products.

High quality biochemicals for the life sciences including liquid antibiotics and custom sterile solutions. Biological buffers and amino acid derivatives, sterile filtered buffer and cell culture solutions, penicillin and antibiotic-containing solutions.

Chemicals for Life Science Research: growth media, DNA and peptide synthesis reagents, nucleotides and protease inhibitors.

Macherey-Nagel offers a comprehensive range of chromatography products including TLC plates, bulk silicas, HPLC and GC columns, filter papers, derivatization reagents and standards.

Full line of cleaning detergents for laboratory, healthcare, and industrial applications. Alconox is the industry leader for critical cleaning products for metal, glass, plastic, rubber, ceramics and electronics.

The ultimate in dispensing convenience – Labmax™ Bottle Top Dispensers with volume ranges from 0.3 to 100 ml. Suitable for most reagents and organic solvents.
