

# When it comes to solvents ...come to Caledon.

# Solvents

**Caledon stocks a complete line of solvents for every application.**

Get the performance you need for reliable, reproducible results. Our state-of-the-art manufacturing methods result in exceptionally pure solvents, consistent from lot-to-lot and bottle-to-bottle.

## Distilled in Glass

- Distillation in efficient glass stills removes interfering contaminants
- Pre-treated before distillation to optimize purity
- Processed and packaged under high purity nitrogen
- Meets ACS specifications for extraction/concentration procedures
- Suitable for use in trace analytical techniques and other applications requiring extremely pure solvents

## HPLC Grade

- Purified in the same manner as our Distilled in Glass products
- <sup>†††</sup> Characterized by gradient elution for HPLC applications
- Meets all ACS specifications for use in Liquid Chromatography

## ACS Reagent Grade

- Meets or exceeds specifications published by the American Chemical Society, Reagent Chemicals, 10th edition
- For use in precise analytical work of a general nature

## Caledon Anhydrous Solvents

- Made by subjecting our high purity Distilled in Glass grade solvents to additional rigorous drying and packaging procedures
- Extremely low water content
- Suitable for applications wherever water content is of concern
